

Technical Information Sheet

Adolit® Color Paste

Art. No. 2141-45

Coloured paste for tinting Adolit wood preservative salts.

Property profile:

Lightfast and weather proof coloured paste for tinting wood with a scumble effect. Water dilutable, high yielding, does not settle.

Range of use:

Adolit Color Paste is used for tinting Adolit fixating wood preservative salts in large-scale procedures such as open tank steeping and impregnation of post bases as well as pressure impregnation procedures.

It is especially suitable for wood used in outdoor areas such as fences, palisades, wood siding and other building elements for garden and landscaping as well as in agriculture.

Production of the solution:

Adolit Color Paste is stirred thoroughly into the ready salt solution in a concentration of 0.2 – 1 %, depending on the desired intensity of colour.

Notes:

Before treated wood is used in outdoor areas, the fixation time required for the salts must be strictly observed to prevent preservative constituents that have not thoroughly dried from being leached out by rain.

Shelf-life:

At least one year in closed, original containers, stored dry and frost-free.

Packaging:

5 kg and 25 kg buckets

Colours: brown Art. No. 2141
red Art. No. 2144
green Art. No. 2145

Safety data:

Observe the usual precautionary measures when working and for storage.

Disposal:

Dispose of product remains in compliance with valid regulations. Completely empty containers should be recycled.

Ecology:

Do not lead into aquatic environments, the sewer system or the ground. Water Hazard Class 1

Labelling:

Flammability class -/-
Regulations on hazardous substances: -/-
GGVS / ADR: -/-
