

ACID CLEANER

USES

For etching and cleaning concrete floors and surfaces prior to the application of the FLEXCRETE REPAIR AND PROTECTION SYSTEM. It is particularly suitable for normal maintenance of concrete floors and for removal of rust and cementitious contamination from a variety of substrates.

ADVANTAGES

- Rapid etching and/or cleaning of concrete or exposed aggregate concrete.
- Removes rust stains from concrete.
- Removes mortar stains from brickwork.
- Cleans hardened mortar or concrete from tools and mechanical equipment.
- May be diluted with water for economic use.

PRODUCT DESCRIPTION

FLEXCRETE ACID CLEANER is a blend of inorganic acid, surfactant and inhibitors used for removal of rust and cementitious contamination from a variety of substrates.

TECHNICAL DATA

Appearance:	Amber coloured, low viscosity fluid.
Specific Gravity:	1.07 at 20°C.
Shelf Life:	Indefinite in manufacturer's sealed containers.

APPLICATION DATA

Application Guide available on request.

Scrape off and remove any excess dirt, grease or other contamination. Thoroughly wet the areas to be treated. Apply **FLEXCRETE ACID CLEANER** and scrub well in with a stiff bristle brush. Allow about 10 minutes to act before thoroughly washing down surfaces with fresh water. Heavily contaminated areas may require repeated application.

PACKAGING

25 litre heavy duty plastic containers.

SAFETY DATA

Safety Data Sheet available on request.
