

## Technical Information Sheet Article No. 0675

# Combi WR

A combination of weak acids, free of surface-active agents

### Range of use

Remmers Combi WR is used especially for weak acidic cleaning of wall surfaces (sand-lime brick, brick, fair-faced concrete) but is also suitable for natural stone surfaces and tiles. It can also be used for the removal of lime deposits on tiles in showers and swimming pools.

### Property profile

Weak acidic cleaner combination, ready-to-use. When used properly it does not attack even sensitive mineral building material surfaces. Lime and mortar laitance are dissolved along with superficial soiling.

### Directions

The substrate should always be thoroughly pre-wet so that the cleaner does not penetrate too deeply into the building material. Apply Combi WR, clean mechanically (scrub brush) and wash off thoroughly. Do not use lye as a neutralisation agent. In case of heavier soil, the procedure can be repeated. Large surfaces with heavy soil can be worked over with a hot water jet or steam cleaning equipment.

### Characteristic data of the product

#### Characteristic data of the product in the packaged state

Density:	1.08 kg/l
pH value:	approx. 2.50
Appearance:	clear, water based solution

Adjoining surfaces and facade elements that should not come in contact with the cleaner should be covered with PE sheet. A trial area is recommended.

### Tools, cleaning

Scrub brushes, high pressure equipment.

### Packaging, application rate, shelf-life

#### Packaging:

1 kg, 5 kg and 30 kg plastic canisters

#### Application rate:

0.3 - 0.5 l/m<sup>2</sup> depending on soil.

#### Shelf-life:

At least 3 years stored dry and frost-free in closed, original containers.

### Safety, ecology, disposal

Avoid contact with skin and eyes. Further information on safety when transporting, storing and handling as well as on disposal and ecology is found in the latest Safety Data Sheet.

The statements above are compiled from our field of production and according to the latest technological developments and application techniques.

Since application and working are beyond our control, no liability of the producer can be derived from the contents of this information sheet. Any statements made beyond the contents of this information must be confirmed in writing by the producer.

In all cases, our general conditions of sale are valid. With the publication of this Technical Information Sheet all previous editions are no longer valid.
